

Winter Is Coming !!!

Your Plants can be stressed when the COLD Weather hits. Cold conditions combined with Dry Roots can cause a lot of damage to your plants. **Mulch is great protection for your plants.** We recommend that you maintain sufficient coverage of Pine Straw or Wood Mulch to ward off plant root Damage.

Winter Pruning & Perennials...

You'll notice that we will begin cutting back Liriope (Monkey Grass), Crape Myrtle trees and Decorative Grasses very soon. Winter is also the best time to have Overgrown Plants re-shaped. Please contact us to schedule your Winter Pruning for 2009.

Route Changes...

During the winter months our Routes may change. This is done to allow Fescue lawns to thaw out, as they can be damaged by servicing when frosted. Also, with the Holidays coming, we will be adjusting our Schedules to allow our staff the Holidays off, therefore, call us for Special Event Needs.

Are the PANSY BLOOMS disappearing?

If you notice your Pansy Blooms or Plants disappearing, Please call us at once. This could be caused by either Deer, Rabbits or Slugs. We offer a Treatment Program and Netting Protection depending on the particular pest.

WE WISH EVERYONE A HAPPY SEASON!
