Watering Hints.....

1. Water Efficiently: When watering PLANTS, apply water directly to soil and avoid watering foliage. Water on foliage in hot / humid conditions causes Fungus.
2. Watering Times: Watering in the early morning is the best for retention of moisture. An estimated 30 % of water is lost to evaporation when irrigating in sunny / warmer hours.
3. Water Deeply: since we are limited on the number of days per week we can irrigate, Water Longer and Deeper to moisten the entire root systems.
